

Logwin Poland's Road + Rail begins Cooperation with Valvoline

Valvoline is one of the leaders in the world automotive market. The company gained its prestige through the production of top-quality chemical products.

The expansion of Valvoline on the world markets followed the purchase of the company by Ashland Inc. in the 1950s. The brand became well-known on the Polish market after the introduction of the rustproofing product Tectyl in 1994. The huge success of this product led to the development of 120 authorized Valvoline stations.

Logwin Poland's Road + Rail division offers the full range of services for Valvoline. This includes warehousing, domestic distribution and full truck loads. A customer of Logwin Poland's Road + Rail division for 2 years now, Ashland also enjoys a similar range of services from Logwin.

About Logwin AG

As an external partner, Logwin AG, Grevenmacher (Luxembourg), develops a comprehensive range of logistics and service solutions for trade and industry.
